

I think that 80% of the state's residents signing up for the Wisconsin "no call" list should speak for itself - the residents are fed up with telemarketing calls.

We do NOT want the state laws weakened. If we felt the federal "no call" laws were stiff enough we wouldn't need the state "no call" laws.

I personally wish there was a way to stop ALL solicitation calls, including those from non-profit organizations. I don't like them, I don't want them, I am sick of getting them!
